Subject: RE: AETT - LWG Meeting Notes and Scope for EPA review and approval
Date: 08/22/2008 02:44 PM

Eric & Chip,
Tom Gainer reviewed the LWG's 7/08 scope of the Beneficial Use & Initial Market Evaluation Addendum Document and Pre-Feasibility Study Treatment Technologies Table as requested by EPA during a June 11, 2008 meeting with the LWG.

Tom thought the scope for the two tasks look OK, but had the following comment:

Page 3 lists several limitations for the Feasibility Study Treatment Technologies table, including unknown cleanup levels, sediment volumes, and treatment area locations, which influence the cost of the treatment technologies. The document states that "treatment technologies that do not effectively treat the Portland Harbor iCOPCs or are clearly cost prohibitive will not be retained for further evaluation in the Feasibility Study." Considering the limitations of this technology screening, is it premature to eliminate technologies from the FS before the "limiting factors" are resolved? Perhaps this initial technology screening should be revisited once cleanup levels, sediment volumes, and treatment area locations are defined.

Hope this helps.

Valerie -

Could you please forward the attached meeting notes and scope of work for the Alternatives Evaluation of Treatment Technologies path forward to EPA for review and approval? Kelley Martin is also posting these documents to the LWG portal, but because of the small size we can go ahead and just send them to EPA now. Thanks!
